Structures for the naval sector
It's the brand which identifies the MED product dedicated to the naval sector

THE ADVANTAGES OF KLIMAPOL FLOATING

1.
LIGHTNESS

2.
ENERGY SAVING

3.
QUICK MANUFACTURING

4.
MAXIMUM CUSTOMIZATION

KLIMAPOL FLOATING: is a patented product by Preformati Italia designed and manufactured to furnish terraces and spaces with a view by combining the beauty of nature and the Design of a water parterre transporting the senses and the body in the time and space that only nature can give.

It is the result of the latest innovation coming from 20 years of projects made using new generation materials.

It was born from the need to create a swimming pool that, due to its lightness and significant size does not weigh down on the load-bearing structure of the building where it's located and at the same time is environmentally friendly both from the point of view of natural beauty and from the point of view of consumption and therefore environmental impact. It is a self-supporting, floating structure made with KLIMAPOL technology.

It is totally free of anchors and requires only a flat base that serves as a support for the pool. The interior furnishings of the pool include relax areas with air, air-water massage, loungers, and custom-made seating.

It ensures maximum energy efficiency due to its excellent thermal insulation qualities.

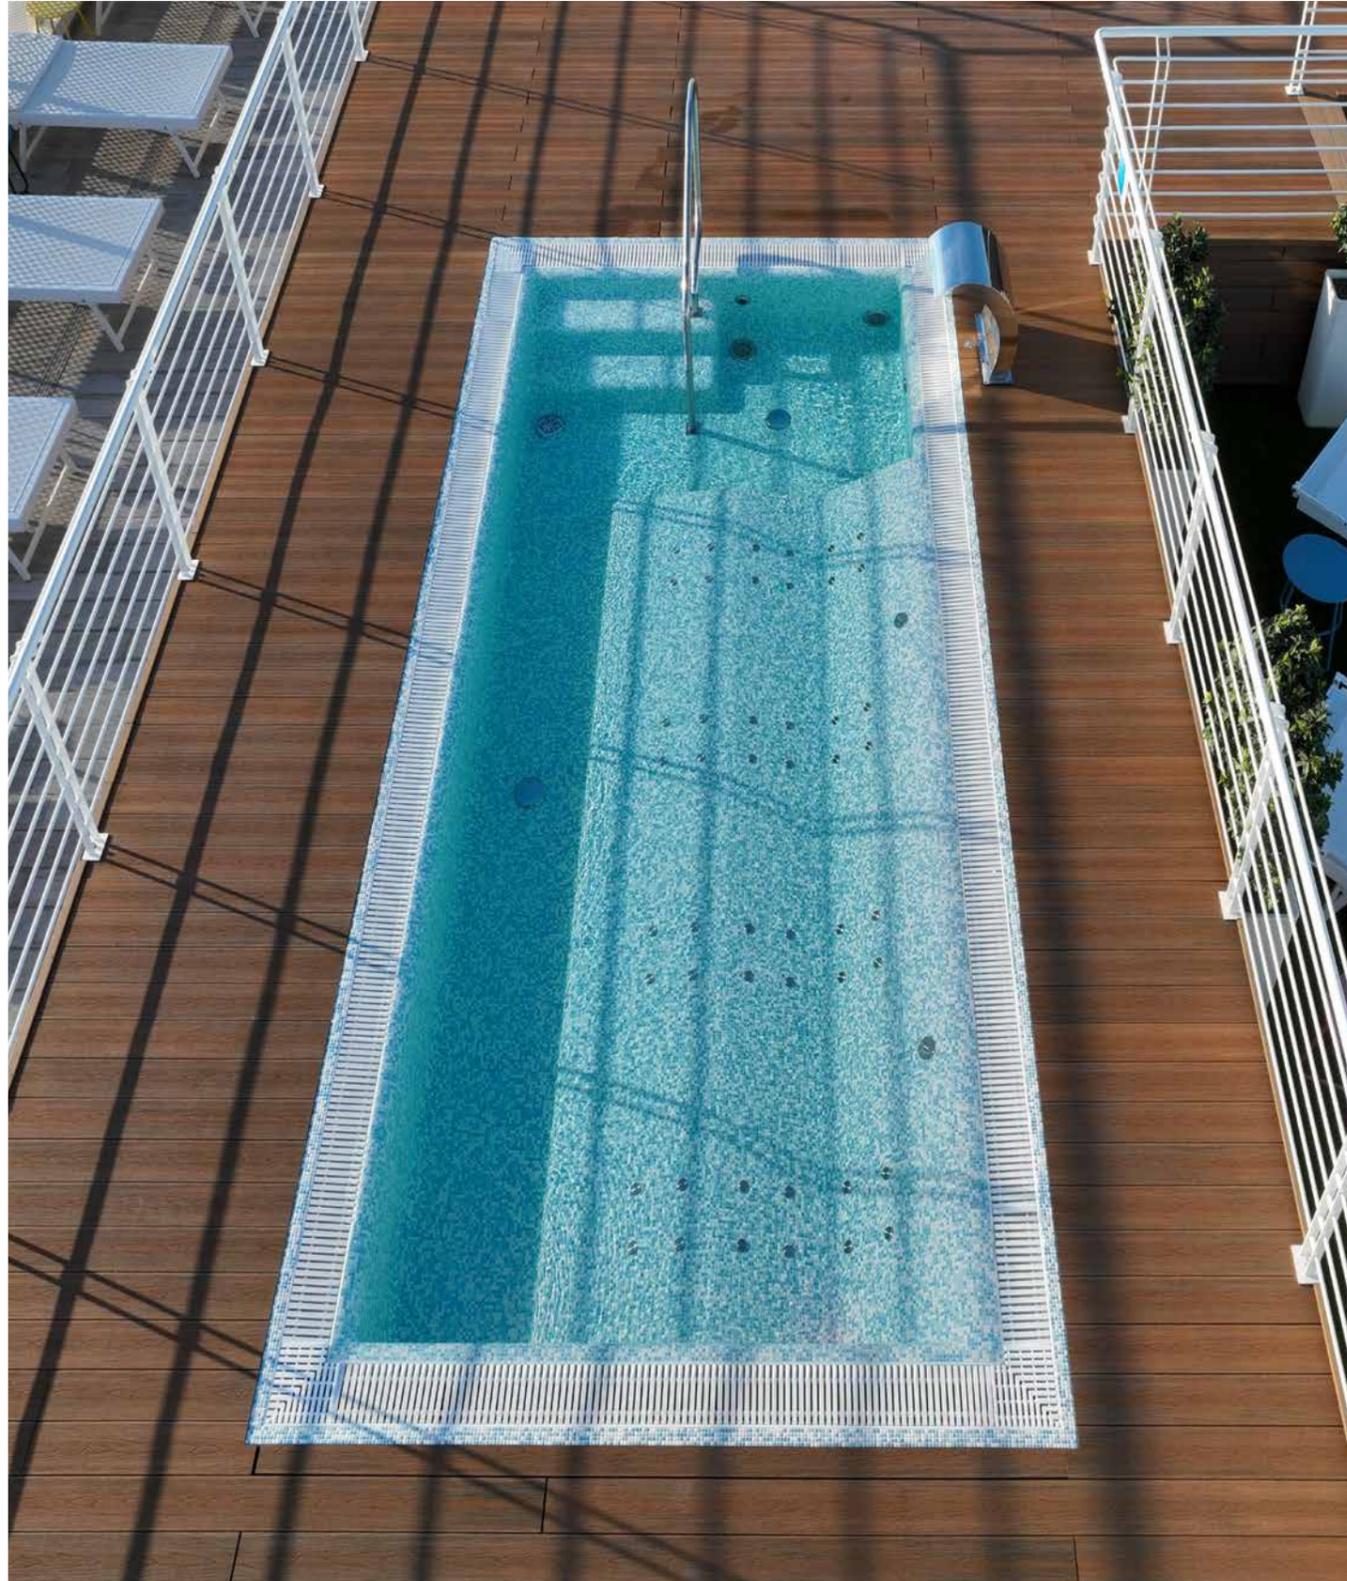

The lightness of KLIMAPOL is combined with maximum mechanical strength given by the perfectly integrated steel frame.

The ultimate finish allows maximum enhancement of the pool design and KLIMAPOL allows the application of any possible coating (mosaic, tile, resin, Liner, marble etc.)

It is a creation of Preformati Italia designed to enjoy the wonder of nature that we can admire while remaining enveloped in the most vital and natural element "water."

Project: Hotel Speranza (Jesolo)

- Structure: Monoblock pool with frame for handling inserted into the EPS structure.
- Self standing and floating structure with special anchorage for handling and transport
- Location: terrace on the 6° floor on hte relax area
- External dimension: 6x3xh.0,82m
- Water depth: 60cm
- Final coating: mosaic
- Features: Overflow with 4 loungers location with air massage

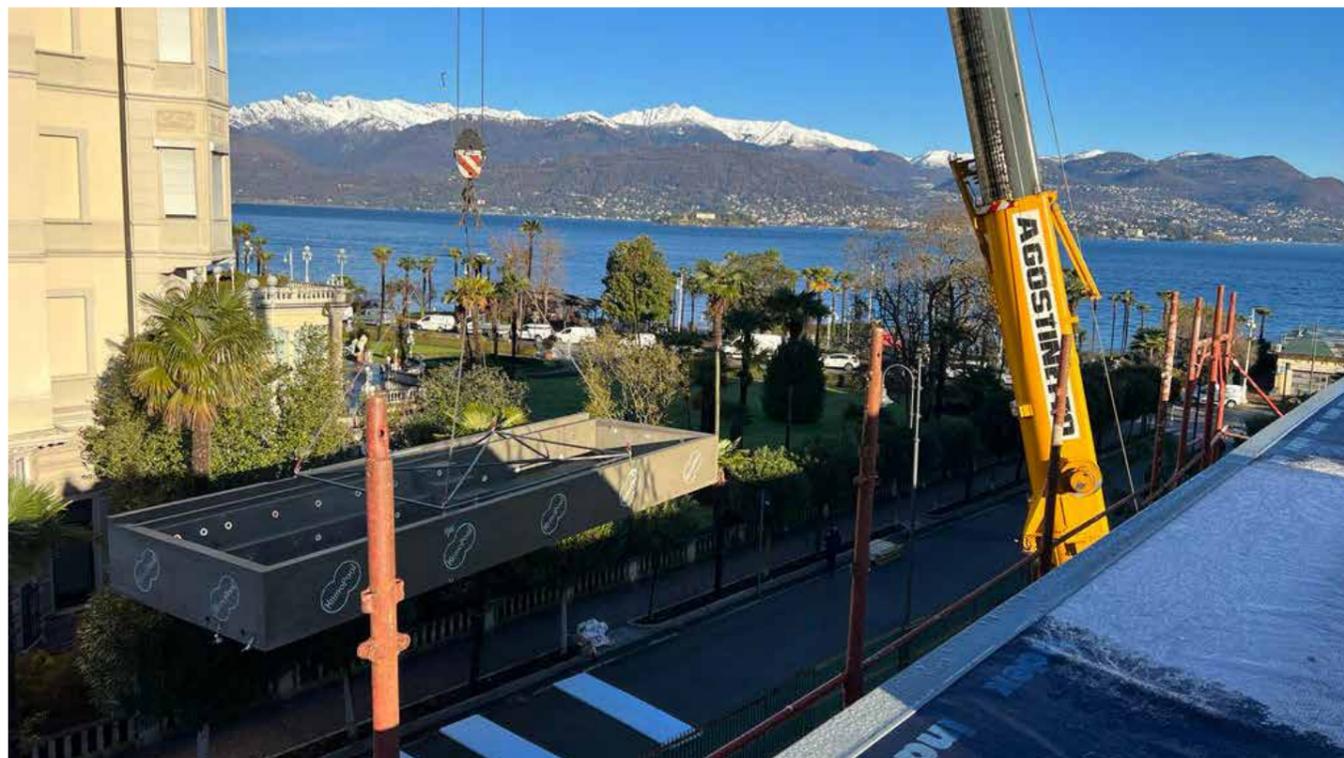

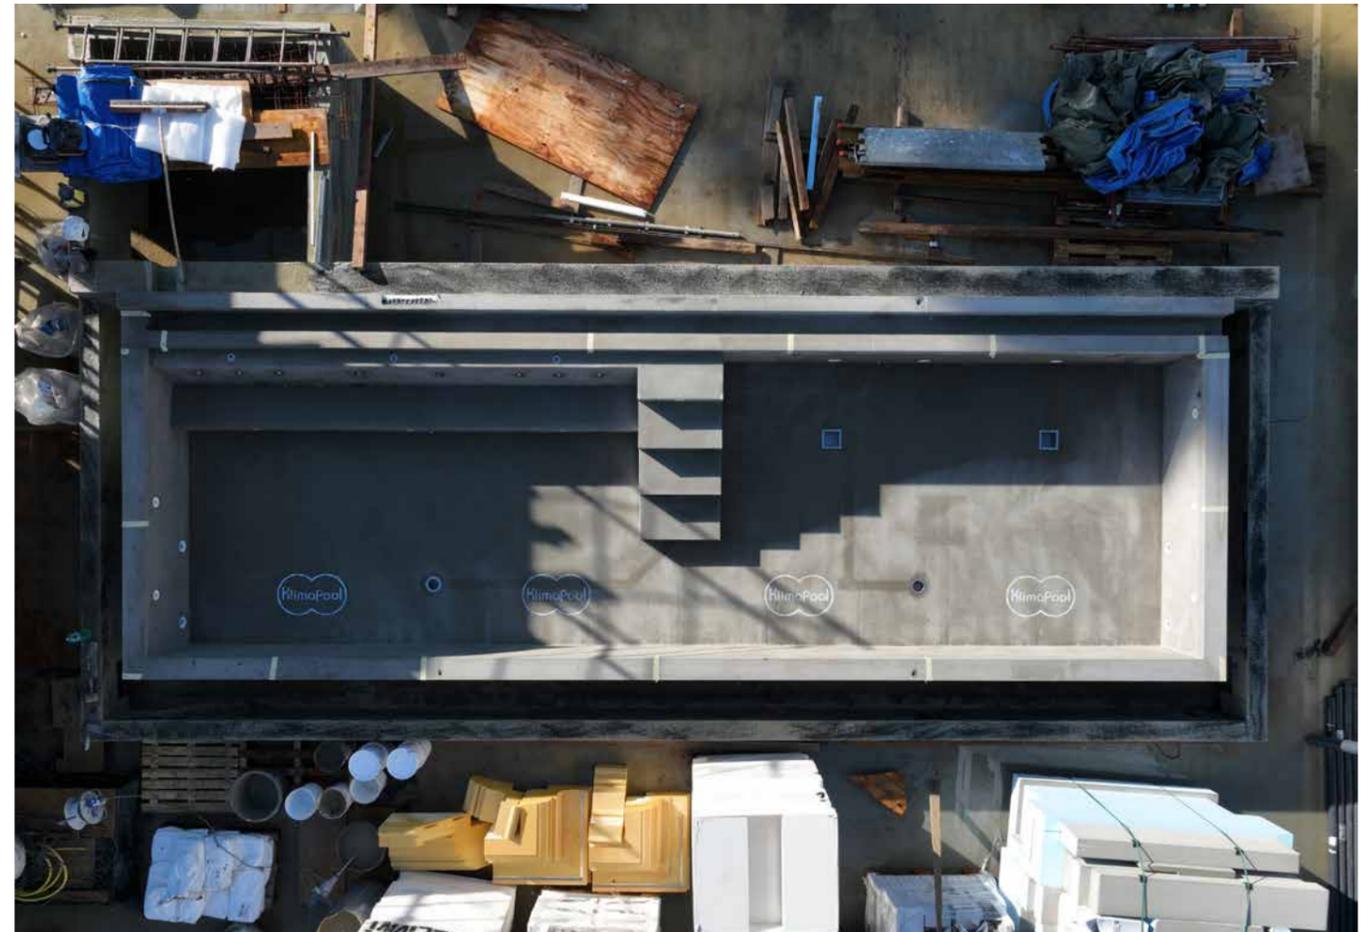

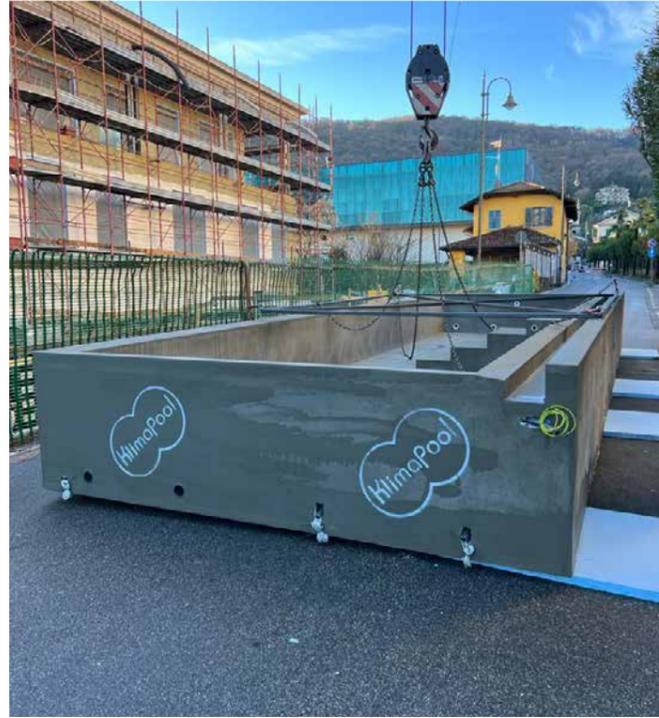

Progetto: Private House

- Structure: Monoblock pool with frame for handling inserted into the EPS structure.
- Self standing and floating structure with special anchorage for handling and transport
- Location: outdoor
- External dimension: 2,9x2,9xh.1,22m
- Water depth: 0,8m
- Final coating: mosaic
- Features: Skimmer filtration with hydromassage locations all around the perimeter

Project: Boutique Hotel (Stresa VB)

- Structure: Monoblock pool with frame for handling inserted into the EPS structure.
- Self standing and floating structure with special anchorage for handling and transport
- Location: terrace on the 3^o floor
- External dimension: 11,3x4,1xh.1,06m
- Water depth: 0,8m
- Final coating: Liner
- Features: overflow pool with inside 1 hydromassage bench and lounge for air massage

Project: Hotel Villa Eugenia (Jesolo)

- Structure: monoblock pool with frame for handling inserted into the EPS structure.
- Self standing and floating structure with special anchorage for handling and transport
- Location: terrace on the 5° floor
- External dimension: 7,8x3,75xh.1,3m
- Water depth: 1,08m
- Final coating: tiles
- Features: overflow pool with one bench inside with 9 hydromassages location

Project: Private House

- Structure: Monoblock pool with frame for handling inserted into the EPS structure
- Self standing and floating structure with special anchorage for handling and transport
- Location: Pool located inside the house on the ground floor
- External dimension: 2,4x2,4xh.1,4m
- Water depth: 0,9m
- Final coating: mosaic
- Features: Tracimazione a sfioro su tutto il perimetro. 4 postazioni idromassaggio sulla panca e gradini di ingresso

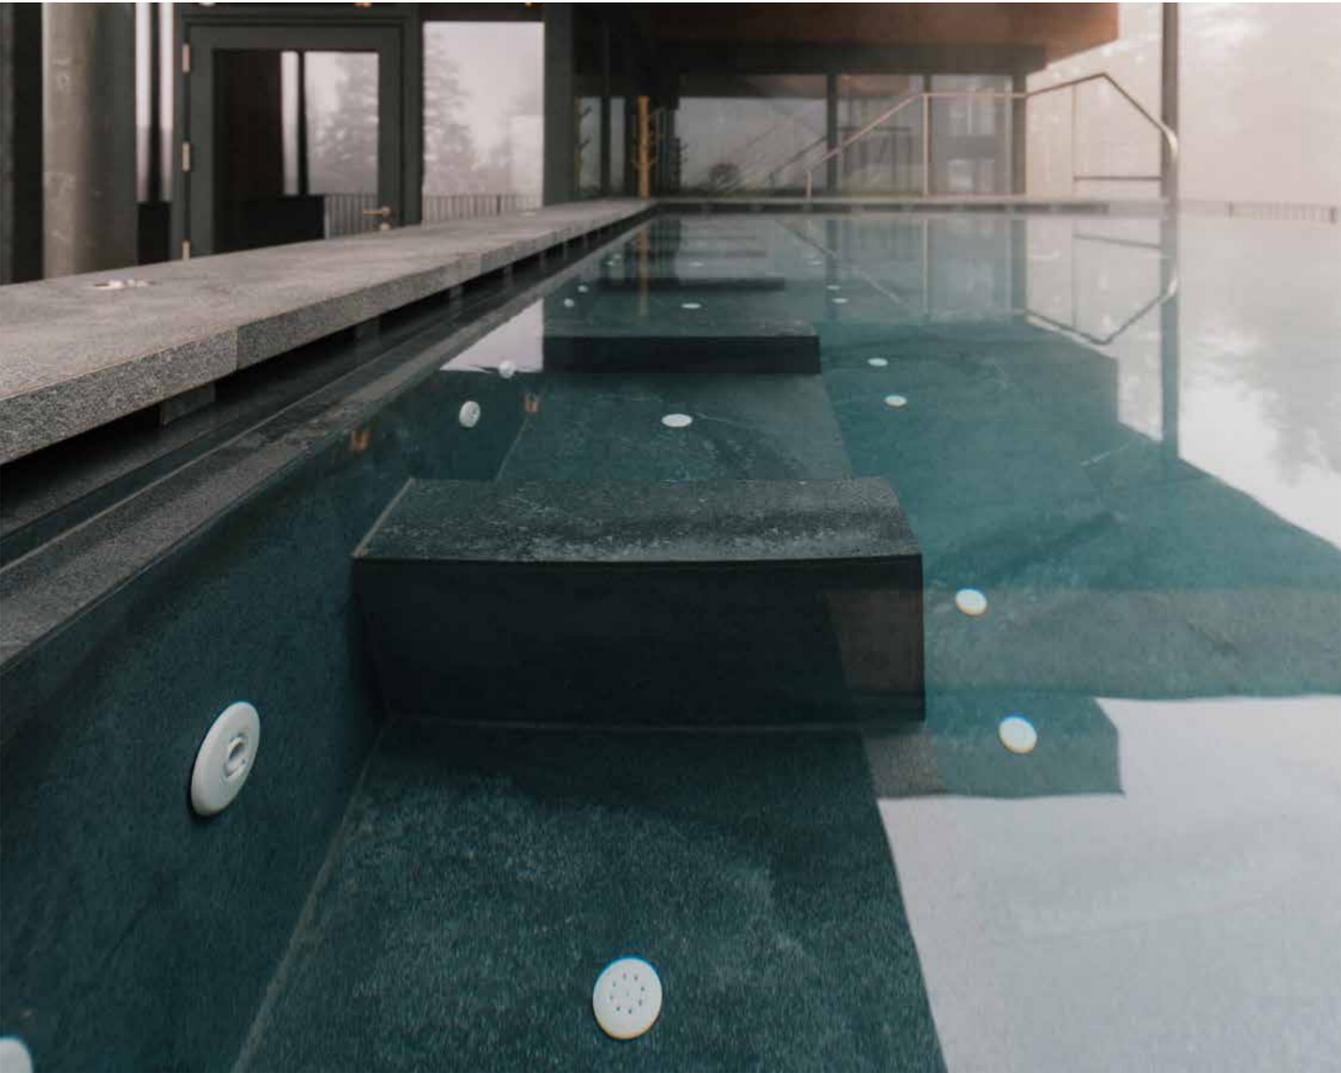

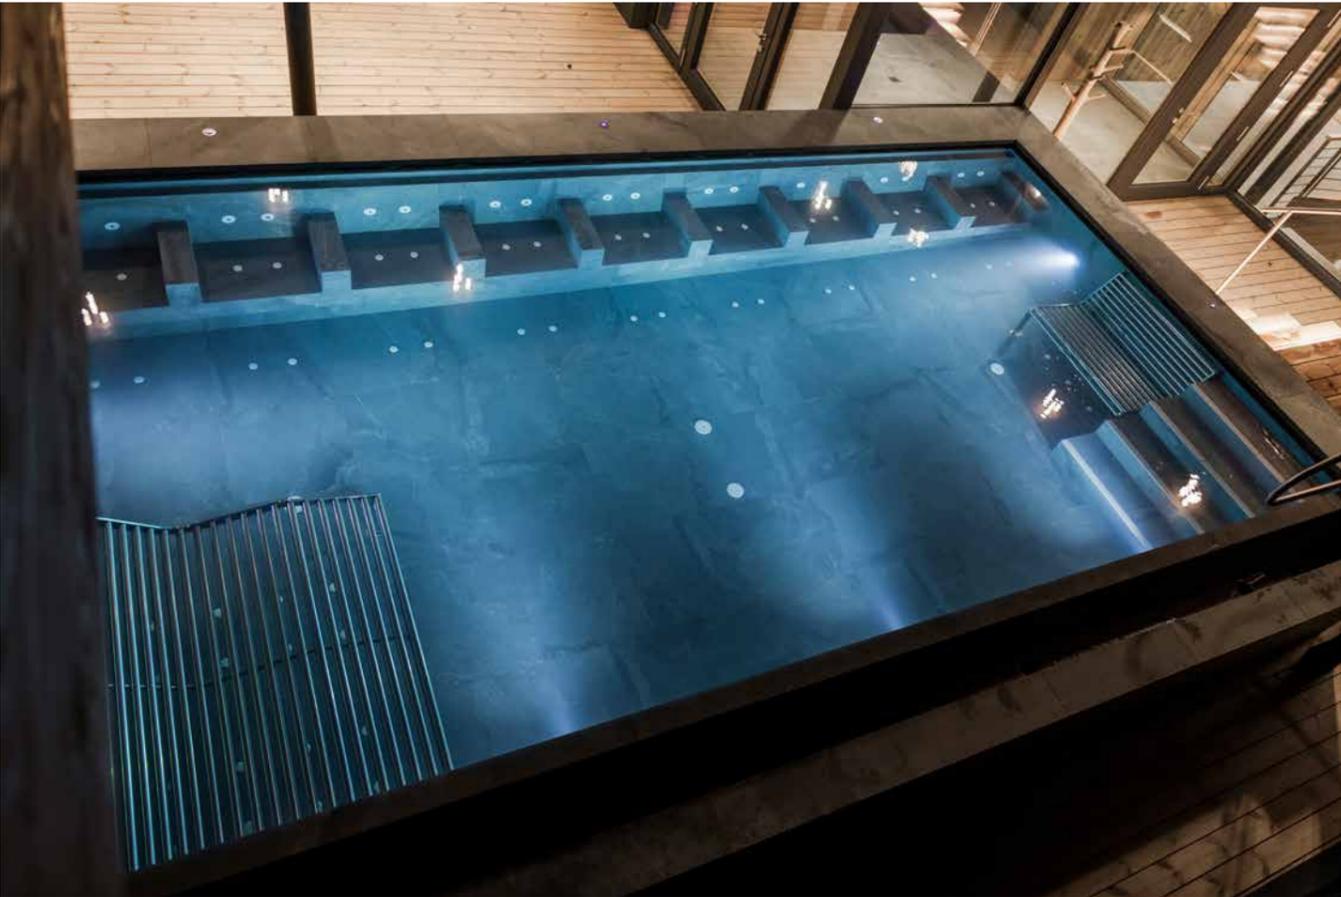

Project: Hotel Magdalener Hof (Bolzano)

- Structure: Monoblock pool with frame for handling inserted into the EPS structure.
- Self standing and floating structure with special anchorage for handling and transport
- Location: outdoor pool, partially underground
- External dimension: 2,05x2,6xh.1,26m
- Water depth: 0,94m
- Final coating: tiles
- Features: pool with overflow all around the perimeter. 3 hydromassage location on the bench.

Project: Joseph Mountain Hotel (Bolzano)

- Structure: pool assembled in the construction site.
- Self standing and floating structure
- Location: terrace on the 5° floor
- External dimension: 8,6x4,34xh.1,3m
- Water depth: 0,98m
- Final coating: gres
- Features: overflow pool with hydromassages benches inside with 9 location and lounge for air massage.
