# KLIMAPOOL

## ReEVOLUTION

INNOVATIVE SYSTEM FOR RENOVATING EXISTING POOLS  
OF ANY SHAPE AND SIZE

**KLIMAP∞OL**

Your class A swimming  
pool

We are an ISO  
9001:2015 certified  
and SOA registered  
company

**PREFORMATI ITALIA®** PURSUES THE GOAL OF DRIVING **INNOVATION** THROUGH WELL-ESTABLISHED **CRAFTSMANSHIP SKILLS**, TOGETHER WITH THE USE OF **HIGH PERFORMANCE MATERIALS** APPLIED TO THE WATER AND **WELLBEING INDUSTRIES.**

THESE FACTORS, IN THE CONTEXT OF THE WORLD OF **ARCHITECTURE & DESIGN**, SERVE TO TURN THE IDEAS OF PRACTITIONERS INTO **QUALITY, HIGH PERFORMING FINISHED PRODUCTS** THAT GO BEYOND THE CONSTRAINTS NORMALLY ASSOCIATED WITH TRADITIONAL CONSTRUCTION TECHNIQUES.

## OUR TRADEMARKS

### Fast-Building using the EPS

The origin of the modular production process for all the structures of Preformati Italia®. The Eps System allows you to realize light and precise custom-made structures saving energy. The installation process is optimized in our factory reducing the period of work on the building site.

**Spamodular cabin**  
Design SPAs for professional usage

EPS NAUTICAL

**Structures for the naval sector**  
It's the brand which identifies the MED product dedicated to the naval sector

# THE ADVANTAGES OF KLIMAPOL ReEVOLUTION

1.  
**LIGHTNESS**

2.  
**ENERGY SAVING**

3.  
**QUICK MANUFACTURING**

4.  
**MAXIMUM CUSTOMIZATION**

**KLIMAPOL ReEVOLUTION:** The purpose of use and new trends and habits impose a marked rethinking of the architectural design of the swimming pool.

Variety of proposals (zones, depths, temperatures), researched architectural design (gulfs, seats, niches, curves, stairs), integration of specific functions (whirlpools, loungers, geysers, river, games), are the consequence of new trends to experience your own pool in relax and fun for the whole family. Klimapool ReEvolution is the right solution that combines all needs.

It is the result of the latest innovation coming from 20 years of projects made using new generation materials.

Ideal solution for re-modeling, renovating existing pools. The components and furnishings are custom-made and allows to redesign shapes and sizes, adding location and furniture, not originally included. All in dry construction, quick in execution time and non-invasive.

It ensures maximum energy efficiency due to excellent thermal insulation qualities.

The ultimate finish allows maximum enhancement of the pool design and KLIMAPOL allows the application of any possible coating (mosaic, tiles, resin, Liner, marble etc.)

It is a creation of Preformati Italia designed to enjoy the wonder of nature that we can admire while remaining enveloped in the most vital and natural element "water."

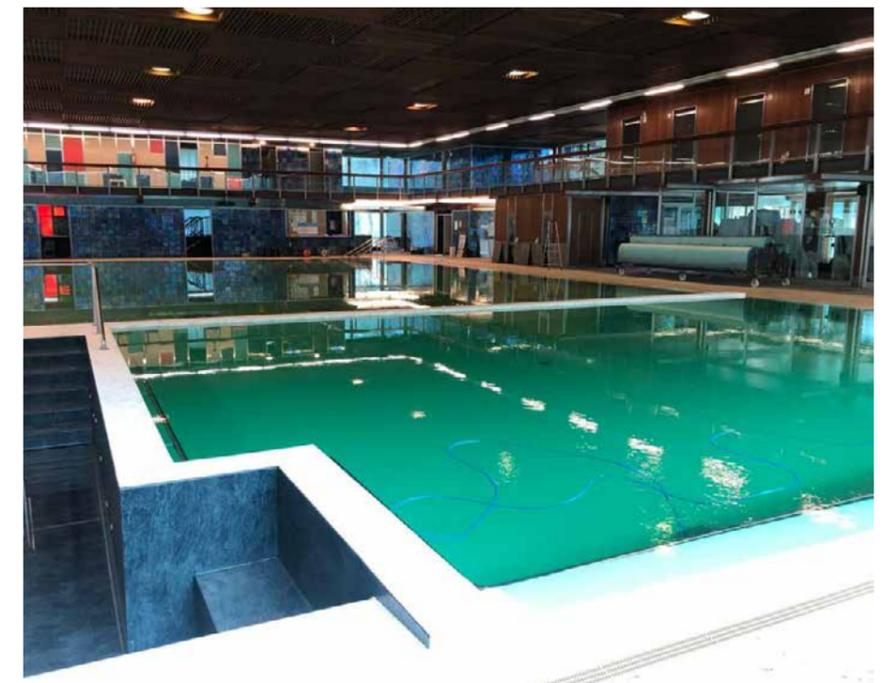

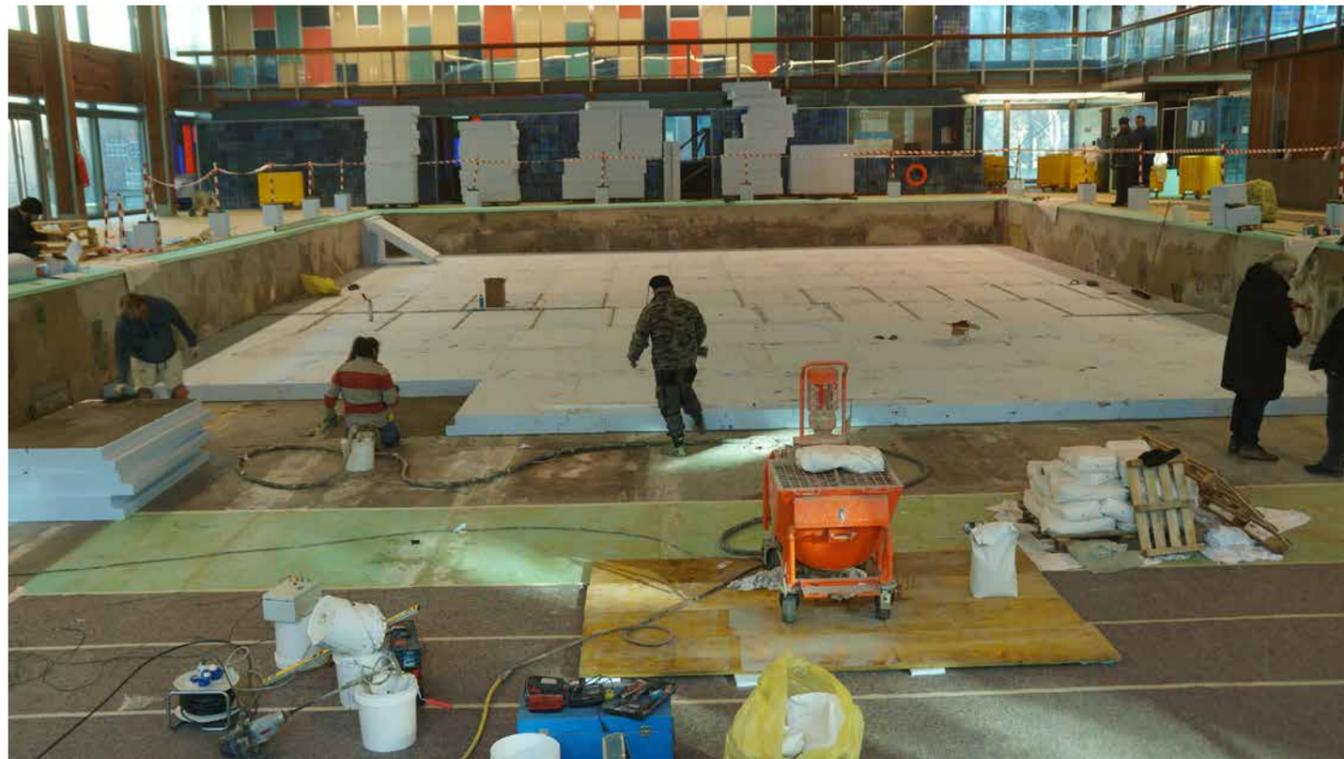

# Project: Asmana Wellness World (FI)

- Structure: benches, loungers and partition walls to divide the relax areas
- Location: outdoor
- External dimension: 25 x 2,3 x h. 1,24 m
- Final coating: stoneware
- Features: pool interiors consisting of benches and loungers with blowing plates. The structures were placed inside an existing pool to renovate the relax area.

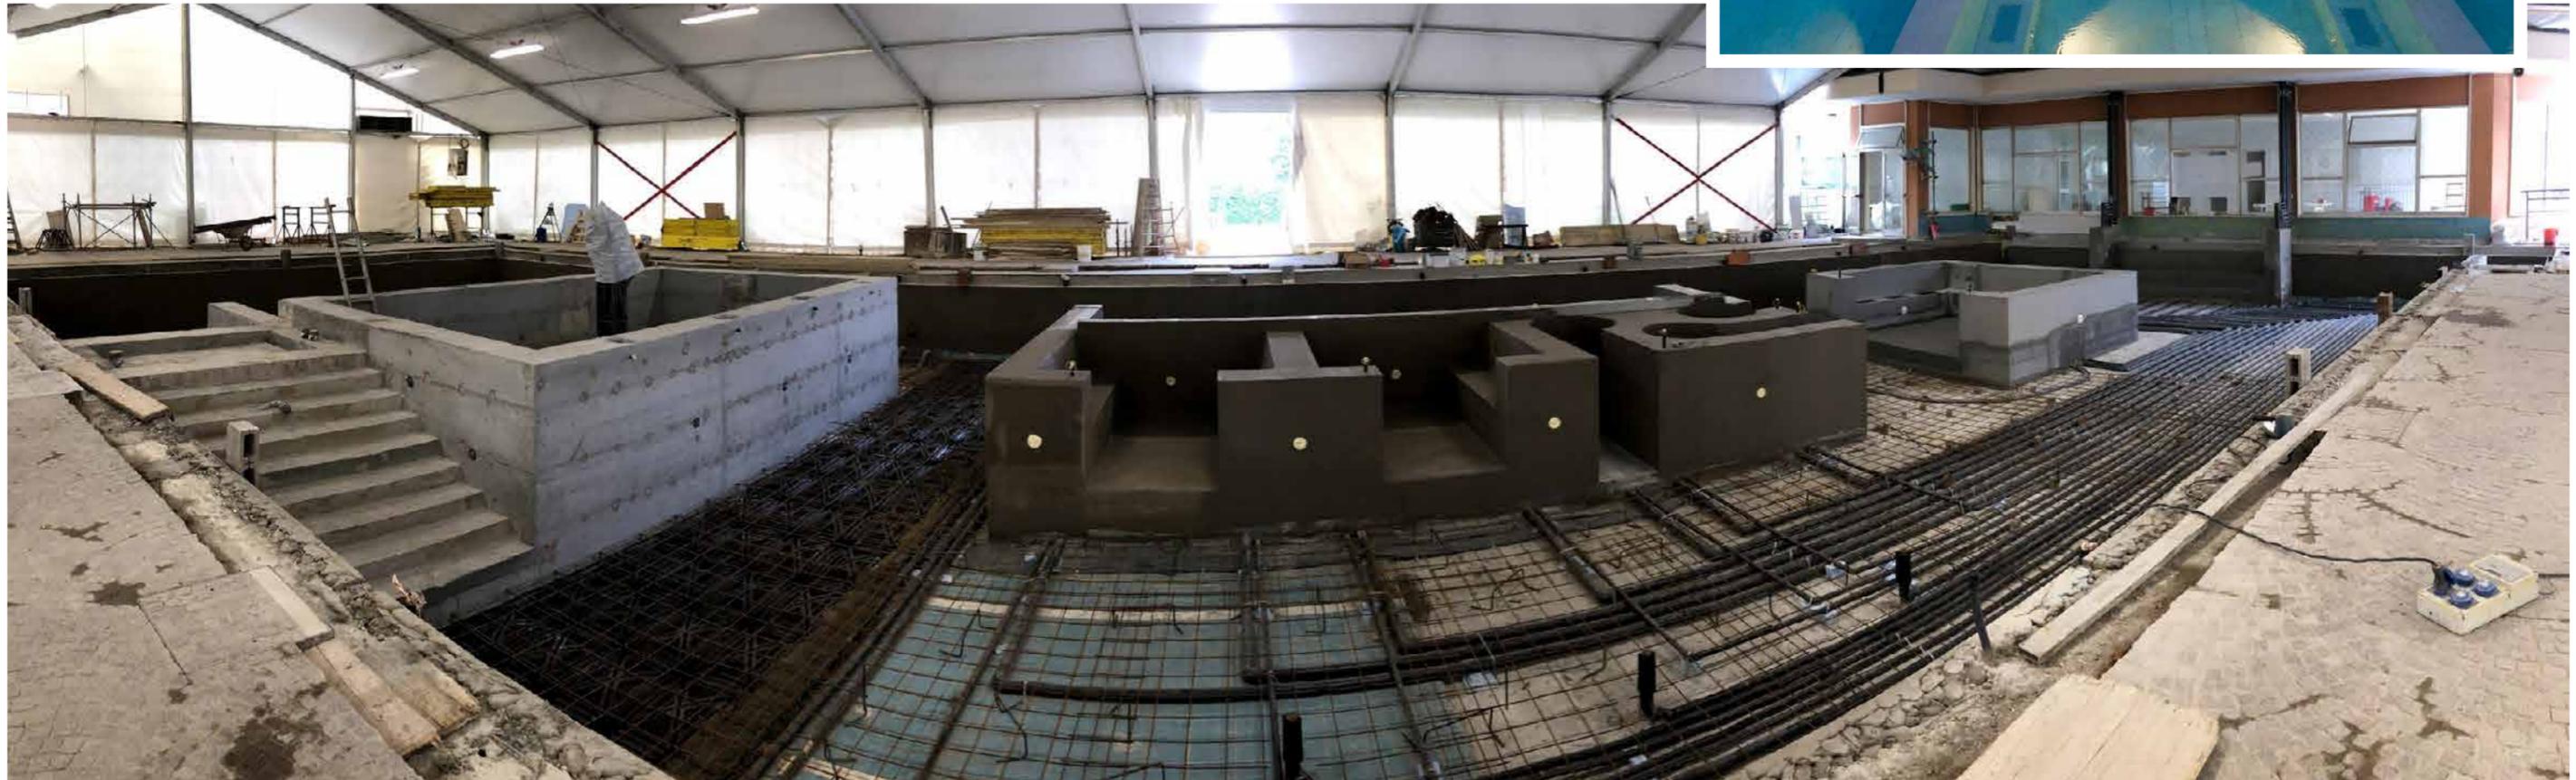

# Project: Terme di Cervia

- **Structure:** new floor and walls with partition of the different spaces and building of the pool with "acqua madre"
  - **Location:** indoor pool
  - **External dimension:** 30 x 14,5 m
  - **Water depth:** from 1,06 to 1,46 m
  - **Final coating:** Liner
  - **Features:** overflow pool. Partition walls reinforced with concrete pillars and curb. Hydromassage path composed of wall-mounted jets.
- Hydromassage path composed of wall-mounted jets.

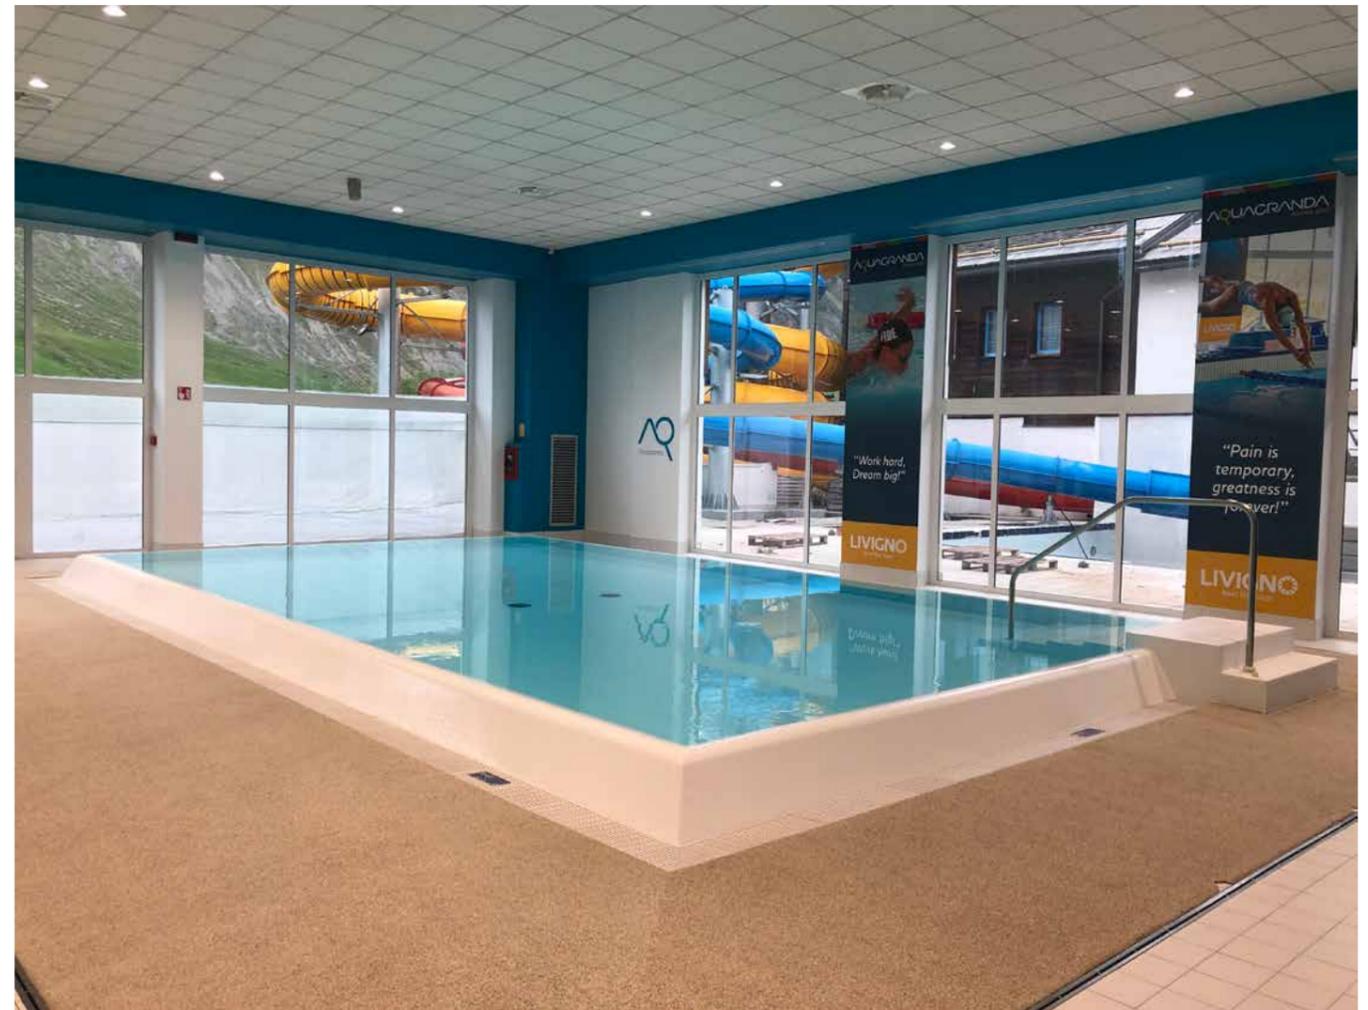

## Project: Montegrotto Terme (PD)

- Structure: pool interiors composed of partition walls, benches and lounge
- Location: outdoor
- External dimension: 33,4 x 12 x h. 1,36 m
- Final coating: stoneware large sized tiles
- Features: pool interiors located inside the existing large pool to renovate the hydromassage area.

## Project: Aquagranda (Livigno)

- Structure: Pool built against the coated old pool walls
- Location: : indoor
- External dimension: 10,2 x 6,2 m
- Water depth: 0,9 m
- Final coating: Liner
- Features: overflow walls all around the perimeter

## Project: Via Della Spiga (Milano)

- Structure: Pool built against the coated old pool walls
- Location: on the terrace
- External dimension: upper pool 5,47 x 4,56 m - water depth: 1,5 m  
lower hydromassage pool 2 x 2,5 - water depth: 0,9 m
- Final coating: tiles and mosaic
- Features: the upper pool overflows on one side, and the water through the cascade wall flows to the lower hot tub. The hydromassage pool has a hidden under-edge overflow and 4 seats. The upper pool has hydromassage location, countercurrent swimming, underwater safety alarm, and shutter compartment.

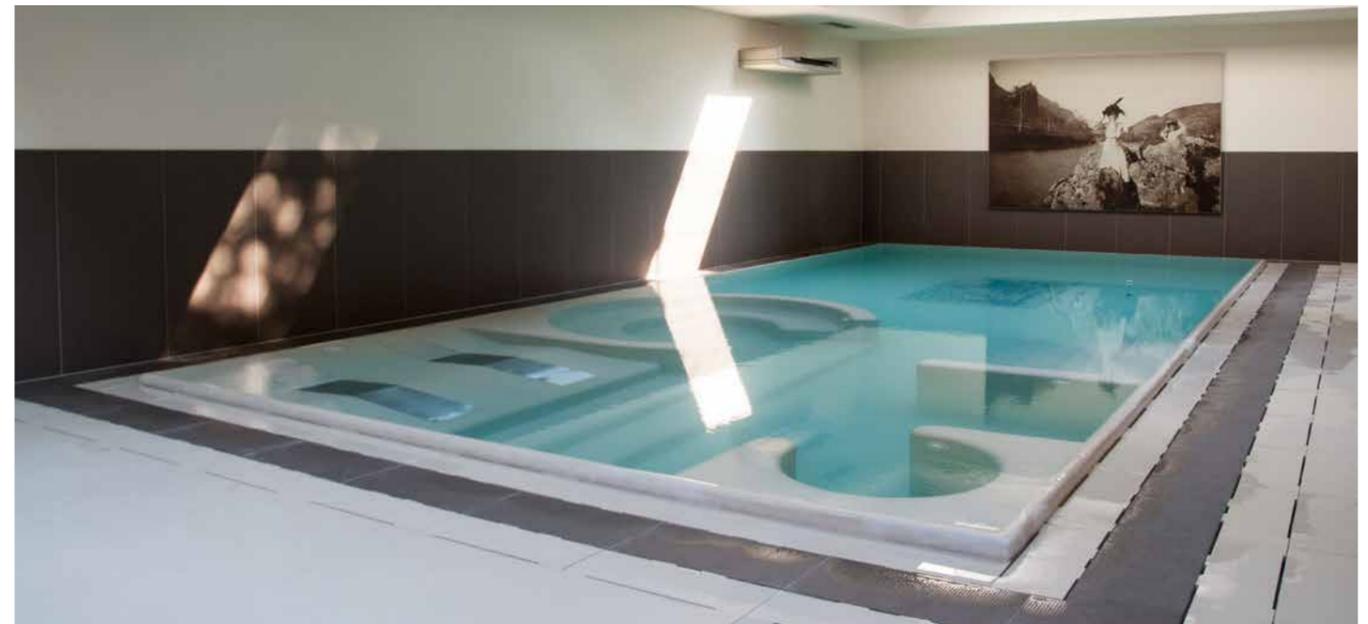

## Project: Private House (Lazise)

- Structure: Pool built against the coated old pool walls
- Location: outdoor
- External dimension: 19 x 9,4 m
- Water depth: from 0,96 to 3,66 m
- Final coating: mosaic
- Features: overflow walls all around the perimeter

## Project: Hotel Villa Italia (Arco)

- **Structure:** Pool built against the coated old pool walls
- **Location:** indoor
- **External dimension:** 10 x 5 m
- **Water depth:** from 1,1 to 1,28 m
- **Final coating:** Resin
- **Features:** overflow walls all around the perimeter. 4 hydromassage location on the bench, 2 loungers with plates for air massage, standing armchair with wall hydromassage and 1 standing location with blowing plate.
